SUMMARY

Java backend developer with ~2 years of experience building Spring Boot microservices, REST APIs, and Azure-hosted services. Strong across Spring Cloud (Eureka, Gateway, Config), Spring Data JPA/Hibernate, Redis caching, and JWT/Spring Security. Focused on building clean, testable services and reliable, fault-tolerant systems.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, SQL
Frameworks	Spring Boot, Spring MVC, Spring Core, Spring Data JPA, Spring Security, Hibernate, React.js, Next.js
Backend	REST APIs, Microservices, Spring Cloud (Eureka, Gateway, Config), Resilience4j, RBAC
Databases	PostgreSQL, MySQL, MongoDB, Redis
Cloud	Microsoft Azure (App Services, Redis Cache, Event Hubs), Azure DevOps
DevOps & Tools	Git, Docker, Kubernetes, Maven, CI/CD
Testing	JUnit, Mockito, Integration Testing, Postman
Concepts	System Design, Fault Tolerance, Caching, Multithreading, Agile/Scrum

EXPERIENCE

Backend Developer – Java, Spring Boot, Microservices

September 2024 – Present

Tata Consultancy Services

Noida, India

- Migrated Talend-based batch jobs to Spring Batch on Azure using chunk-oriented processing and multithreading, adding retry and skip handling for reliable, restartable runs.
- Built persistence with Spring Data JPA over MySQL, introducing composite indexes and pagination to speed up high-volume list queries.
- Designed REST endpoints across multiple Spring Boot microservices with DTO mapping and standardized global exception handling for clean, consistent API contracts.
- Extracted modules from a monolithic codebase into independent Spring Boot services, enabling isolated builds and deployments and improving maintainability.
- Tuned Azure Redis cache patterns (TTLs, eviction policy) and right-sized the cache tier with the team to lower infrastructure cost.

Web Developer Intern – React.js, Next.js, TypeScript

August 2023 – October 2023

ITJOBXS

Mumbai, India

- Built SEO-optimized web pages with Next.js and TypeScript using server-side rendering and image optimization for faster, discoverable pages.
- Modeled the PostgreSQL schema with Prisma using indexed, normalized relations to support efficient queries.
- Rebuilt layouts with Tailwind CSS for mobile-first responsiveness across breakpoints.

PROJECTS

Hotel Rating System [GitHub](#)

Java, Spring Boot, Spring Cloud, Resilience4j, JWT

- Microservices platform with independent User, Hotel, and Rating services; service discovery via Eureka and routing through Spring Cloud Gateway.
- Centralized configuration with Spring Cloud Config; secured inter-service communication with JWT and Spring Security.
- Added fault tolerance with Resilience4j (circuit breaker, retry, rate limiting) and enforced request validation on all endpoints with Hibernate Validator (JSR-380).

Movie Ticket Booking System [GitHub](#)

Spring Boot, REST APIs, MySQL, JPA/Hibernate

- Full-stack platform to search, book, and cancel tickets across city, theatre, show, and screen with managed seat availability.
- Prevented double-booking under concurrent access using row-level locking on seat selection.
- Layered architecture (Controller/Service/Repository) with DTOs and @ControllerAdvice global exception handling over a normalized relational schema.

Quick.ai [GitHub](#)

PERN, Gemini & ClipDrop APIs, Clerk, Neon PostgreSQL, Cloudinary

- Full-stack generative-AI app for real-time text and image generation via the Gemini and ClipDrop APIs.
- Modular React frontend over a Node.js/Express API with Clerk authentication, Neon PostgreSQL storage, and Cloudinary CDN; deployed on Vercel with environment-based configuration.

EDUCATION

Techno Main Salt Lake

Kolkata, India

B.Tech, Information Technology – CGPA: 8.38

August 2020 – July 2024
